

TRAFFIC STUDY COMMISSION

AGENDA

MAY 25, 2023 6:00 PM

Department of Public Works

101 Lamb St., Attleboro

1. Approval of Meeting Minutes: April 27, 2023
2. Old Business:
 1. The new rotary at Drummond and Rathbun Williard has a stop sign present on Drummond. DPW will investigate to see if this is a temporary measure.
 2. The Queue line for student pickup at the high school is longer than anticipated and reaching into the rotary. This may be due to the parking lots not being completed yet for the high school. Attleboro Police have not seen any issues with queues in the rotary but will continue to investigate.
 3. Section of Rathbun Willard near the Studley football field has a no parking section but many cars are still parking there. DPW will reach out to the parking enforcement company to ask for help with enforcement in the area.
3. New Business brought forward by the Traffic Study Commission:
Pending

4. New Business brought forward by the City Council: Pending

5. New Business brought forward by the Mayor: The following issue is from a resident from the Upland Road area of Attleboro.

I am writing to request your assistance with traffic issues on Upland road and the surrounding roads. The first issue is that the Upland road is used as a cut through to avoid the backup on Holden@N Main St, this causes non residents to travel at excessive speeds, this occurs in the morning and evening each day. The second issue is the posted speed of 30 mph, cars park on both side of the road, young children play near or close to the street and 30 mph is way to fast for a residential road with limited sight lines when cars are parked. The other day a speeding car went up on the sidewalk and hit a fire hydrant sending it into the neighbors yard. My children live on this road with my very young grandchildren, we walk this street every day with them and the onslaught of speeding cars needs to be addressed before someone is killed.

6. New Business brought forward by the DPW: Pending
